Nyphian Nyambane

Nairobi, Kenya

Designer and Mobile and Web Frontend

A learning mobile and website frontend developer with skills in HTML, CSS, JavaScript, and frameworks like Angular, Vue.js and Dart. Skilled in crafting visually appealing and user-friendly interfaces, implementing accessibility standards, and optimising for search engines. A quick learner, team player, and adaptable to new technologies.

ACADEMIC AND WORK HISTORY

03/2019 to 06/2021

Jomo Kenyatta University Of Agriculture & Technology

Information and Technology

As an IT student, I learned programming languages, software development, and gained practical experience developing web and mobile apps, working on group projects, and participating in coding competitions, which prepared me for a career in tech.

10/2019 to 08/2022

Kejani Kenya

Remote Real Estate Sales Agent

As a Remote Real Estate Sales Agent, I helped clients virtually with property tours, negotiation, and marketing strategies while using digital tools for communication and organisation, which required adaptability and strong communication and negotiation skills.

011/2022 to Currently

Open-Source Application Network Alliance (OSANA)

Junior Developer

At OSANA, I worked with other developers to advance open-source network applications, by developing new features and identifying areas for improvement. It was a challenging and rewarding experience, requiring technical expertise, communication skills, and collaboration within a developer community.
